The University Department of Geography is a pioneer study center for the study of Geography in eastern India and is sharing the long-sighted list of international and scholarly faculty members since its inception in 1954 Viz. prof. Enayat Ahmed, Prof P. Pandey, Prof D.P Satpati, Prof L.C.C.N Shahdeo, and many other world-famous teachers. This department is known for research, especially in Geomorphology, Landscape and agriculture, Regional Planning and development, Cartography, Remote sensing and GIS application in Geography, and population Geography. More than 250 doctoral degree 06 D.Litt. degree awarded.

The department has a state-of-art computer lab and a surveying lab. The high quality of teaching and research is the hallmark of the Department.

About Ranchi:

Ranchi is the capital city of the Indian state of Jharkhand. It is located in the eastern part of the country and is known for its rich mineral resources, particularly coal and iron ore. Ranchi is situated on the Chota Nagpur Plateau, characterized by forest. Ranchi has a moderate climate throughout the year with pleasant weather it has many tourist spots with various temples and dams by Biodiversity Park and Falls.

Concept/ About the Conference:

The focal theme of this year's national seminar is "Climatic Vulnerability: Challenges to Physical Landscape and Human Response" Climatic vulnerability has become a global challenge. Political summits at the global level have almost failed to resolve global issues related to climate vulnerability as like rise of greenhouse gases, ozone depletion, pollution, depleting biodiversity, increasing number and intensity of disastrous cyclones, global warming, sea level rise, forest depletion, terrain and landscape changes against the law of nature and so on. There has been a human response to bring sustainable development but odds coming from nature and also the human system are so strong and intense that the sustainable development targets are found in back gear and the vulnerable climate continues to remain in the alarming and disastrous situation. Sometimes the human response to face the challenge of sustainability seems to be armless and the challenge is to the human system becoming a challenge to the existence of not only mankind but to the entire biosystem. The physical landscape has its law of evolution. Climate is one of the most important determinants of the nature of the physical landscape. Vulnerable changes in climate have started to bring changes in the landscape. it has caused the emergence of new areas of flood deposits new areas of Badland topography, new areas of undulating landforms, changes like coastal, mountain, and hill landscapes, new areas under desert landscape, depressed landforms, new waterlogged areas, drying old water bodies, etc.

Human response to the environment has been a matter of time immemorable. However, earlier changes in the environment were a slow process and human response was slow but adjusting. The present situation is different. Changes particularly climate change have become vulnerable within a short span of time. Human beings have equipped themselves with the best available sustainable technology but vulnerability is high that our efforts are not very effective. Moreover, nature displays vulnerability is so high that our efforts are not very effective. Moreover, nature displays

vulnerability as a single unit but human groups are divided on key issues related to climate vulnerability and zero-level emission of CO₂ by 2050 as per the Paris accord. Only a few countries have made a commitment declaration. India has announced to achieve zero-level targets by 2070. In fact, human response needs to be started at the micro-level and the involvement of the community may bring more sustainable consequences. To have a detailed discussion on this complex issue in a 2-day seminar, the focal theme will be taken up under the following sub-themes

Sub Themes:

- Basic components of climate.
- Global pattern of climate
- Causes of changes in Climate.
- Consequences of changes in climate.
- Causes of climatic vulnerability
- Consequences of climatic vulnerability
- Physical landscape of Bihar/Jharkhand.
- Climate of Bihar/Jharkhand.
- Recent changes in the rainfall pattern of Bihar / Jharkhand.
- Cyclone in Bihar / Jharkhand and recent changes in their distributional pattern.
- Indicators of climatic vulnerability in India.
- Indicators of climatic vulnerability in Bihar /Jharkhand.
- Impact of flood and drought on the landscape of Bihar/ Jharkhand.
- Impact of deforestation, mining activities, and growth of built-up areas on Physical landscape.
- Human response for livelihood on changed physical landscape.
- Climatic vulnerability and sustainable development goals.
- Agro-climatic regionalization under the changed physical landscape.
- Agro-climatic regionalization in the climatic vulnerable situation.
- Human response to bring sustainable development at the micro-level.
- Village ecology and climatic vulnerability.
- Urban ecology and climatic vulnerability.
- Any other topic related to the focal theme, Geography & Geoscience & Environmental Science.
- Meteorology.

Objectives:

- The major objectives of the conference are the following –
- To raise consciousness about Climatic vulnerability on physical landscape

and society, and the urgent strategy and planning to mitigate its effects.

- Assessment of the contemporary issues raised by the changing climate and find out the path to recovering an Ultimate Solution.
- Find out the way of Sustainable Development.
- To discuss and develop strategies, Policies, and frameworks for addressing climate change at local, national, and international levels.
- To share the latest information and findings on climate change and to discuss the potential solution.

Research Paper Publish:

- Selected research papers will be published UGC - Care listed, Geographical Perspective, Geographical Outlook & Peer reviewed Journal.

Invitation:

It is a matter of great pleasure to invite you to National Conference (Multidisciplinary) & Symposium on Climate Change : Challenges and Opportunities organised by IQAC & University Department of Zoology, Ranchi University on 25th to 28th May 2023 at University Department of Zoology, Morabadi, Ranchi.

About Ranchi University :

Ranchi University came into existence on 12th of July 1960 as an autonomous institution as it was carved out of erstwhile Bihar University. The University started with ten Postgraduate Departments, one Constituent College and 20 affiliated Colleges; today, it has 30 Postgraduate Departments, 19 Constituent Colleges and 47 affiliated Colleges which are catering to the needs of nearly 1.6 lacs of students. With a view to make Higher Education accessible to a vast population of a predominant tribal region, this University has been rendering valuable services to a big chunk of marginalized young generation since its establishment. The University is committed to academic excellence in teaching and research, innovation and creativity, respect for cultural diversity, individual dignity and worth, responsible stewardship and conservation of resources, leadership and involvement in the economics, social and professional growth of the region and the nation.

About University Department of Zoology :

University Department of Zoology was established in the year 1955, with Prof. K C Bose as Head of the Department. With more than 6 decades of its glorious existence as an ideal centre for teaching and research in Zoology, it has carved out a niche for itself in India. Approximately 270 scholars have been awarded doctorate degree of Ranchi University under the guidance of faculty members and more than 1600 research papers have been published by them. The department has the distinction of carrying out pioneering research in the field of fish endocrinology, ecology, environmental sciences, helminthology, human genetics, ethno-medical zoology and wildlife management.

About Ranchi

Ranchi is the capital city of the Indian state of Jharkhand. It is located in the eastern part of the country and is known for its rich mineral resources, particularly coal and iron ore. Ranchi is situated on the Chota Nagpur Plateau, which is characterized by hills and forests. Ranchi has a moderate climate throughout the year, with pleasant weather. It has got many tourist spots with various temples, dams, biodiversity park and falls.

Concept / About The Conference :

Climate change refers to long-term shifts in temperatures and weather patterns. These shifts may be natural, such as through variations in the solar cycle. But since the 1800s, human activities have been the main driver of climate change, primarily due to burning fossil fuels like coal, oil and gas.

"It has been clear for decades that the Earth's climate is changing, and the role of human influence on the climate system is undisputed."

– Masson-Delmotte

"Climate change is already affecting every region on Earth, in multiple ways. The changes we experience will increase with additional warming."

– IPCC Working Group I Co-Chair Panmao Zhai

Climate change poses a significant threat to communities and businesses globally. Rising temperatures, sea levels, and natural disasters are already profoundly impacting our economies, societies, and the environment. To mitigate these effects, it is essential that we collaborate and work towards building resilience and ensuring a sustainable future.

The Climate Change : Challenges and opportunities Conference is a gathering of experts, practitioners, policymakers, and stakeholders aimed at fostering the exchange of ideas, sharing successful strategies, and exploring the challenges and opportunities for strengthening resilience in the face of climate change. The conference will provide a valuable opportunity for attendees to network, learn from each other, and gain new insights into the challenges and opportunities of building resilience in the face of climate change. It will be a platform for exchanging ideas, sharing experiences, and fostering collaboration between key stakeholders in this critical area.

Objectives:

The major objectives of the conference are the following:

- To raise awareness about the impacts of climate change, and the urgent need for action to mitigate its effects.
- To share latest information and findings on climate change, and to discuss the potential solutions.
- To serve as a catalyst for action on climate change, inspiring individuals, organizations, and governments to take concrete steps.
- To discuss and develop strategies, policies, and frameworks for addressing climate change at local, national, and international levels.
