Members of Board of Studies of NEP PG Programme in Geography as per Guidelines of the Ranchi University, Ranchi

1. Chairman :-

Dr. Jitendra Shukla
Associate Professor & Head
University Department of Geography, Ranchi University, Ranchi

2. Internal Members:-

i) Ms. Mary Shalini P Kerketta
Associate Professor
University Department of Geography, Ranchi University, Ranchi

ii) Dr. Sunil Kumar
Assistant Professor
University Department of Geography, Ranchi University, Ranchi

iii) Dr. G.K. Singh
Assistant Professor
University Department of Geography, Ranchi University, Ranchi

iv) Dr. UCN Tiwari
Assistant Professor
University Department of Geography, Ranchi University, Ranchi

v) Dr. R.R. Srivastava
Assistant Professor
PG Dept. of Geography, St. Xavier's College, Ranchi

vi) Dr. D. Roy
Assistant Professor
Dept. of Geography, Nirmala College, Ranchi

vii) Dr. Surbhi Sahu
Assistant Professor
Dept. of Geography, Ranchi Women's College, Ranchi

Arts Block - C, Morabadi Campus, Ranchi - 834008, Jharkhand

HIGHLIGHTS OF NEP PG CURRICULUM

CREDIT OF COURSES

The term 'credit' refers to the weightage given to a course, usually in terms of the number of instructional hours per week assigned to it. The workload relating to a course is measured in terms of credit hours. It determines the number of hours of instruction required per week over a semester (minimum 15 weeks).

- a) One hour of teaching/ Lectures or two hours of laboratory /practical work will be assigned per class/interaction.

One credit for Theory = 15 Hours of Teaching

One credit for Practicum = 30 Hours of Practical work

One credit for Internship = 02 Weeks of Practical experience

- b) For credit determination, instruction is divided into three major components:

Hours (L) – Classroom Hours of one hour duration.

Tutorials (T) – Special, elaborate instructions on specific topics of one hour duration

Practical (P) – Laboratory or field exercises in which the student has to do experiments or other practical work of a two-hour duration.

Internship – For the Exit option after 1st year of the 2-year P.G. Programme for the award of P.G. Diploma, Level 6.5, Students can either complete two 4-week internships worth 2 credits each or one 8-week internship for all 4 credits. This practical experience connects academic learning with real-world applications, offering valuable exposure to professional environments in their fields of study

PG CURRICULUM

1. The PG Curriculum will be either of 1-year duration for students who studied the four-year UG Programme (FYUGP) or a 2-year duration for students who studied a three-year UG programme from a CBCS/LOCF/FYUGP Curriculum.
2. There is a flexible mode in the PG programme offered to the students of Ranchi University, Ranchi. The total credit for any semester will be 20 credits.
3. **Two-year PG curriculum:** The First year of the PG curriculum offers coursework only. There will be 3 courses at level 400 and 2 courses at level 500 in the first and the second semesters of any 2-year PG programme.
4. **One-year PG curriculum:** The Courses in the 1-year PG programme and the second year of the 2-year PG programme are the same.
 - a. **Course work only:** There will be 5 courses at level 500 of 4 credits each in every semester for the coursework offered in the programme.
 - b. **Course work and Research:** There will be 5 courses at the level 500 bearing 4 credits each in the first semester of a 1-year PG or in the third semester of a 2-year PG. There will be Research work offered in the next semester for this mode offered in the programme. The eligibility for this mode is available in the NEP PG curriculum of Ranchi University, Ranchi.
 - c. **Research work only:** The eligible student will be offered this mode to conduct extensive research under the supervision of a guide. Each semester will be equivalent to 20 credits. The selection of a candidate for the research mode will depend upon the eligibility of the student, availability of the guide and seat in the department/institution of Ranchi University, Ranchi.

PROMOTION CRITERIA

Two Years Post-graduation programme having coursework only:

- i. Each course shall be of **100 marks** having two components: **30 marks for Sessional Internal Assessment (SIA), conducted by the Department/College and 70 marks shall be assigned to the End Semester University Examination (ESUE), conducted by the University.**

- ii. The marks of SIA shall further break into, 20 for Internal Written Examinations, 05 for Written Assignment/ Seminar presentation and 05 for overall performance of a student including regularity in the class room lectures and other activities of the Department/College.
- iii. The Requisite Marks obtained by a student in a particular subject will be the criteria for promotion to the next Semester.
- iv. There shall be two written internal examinations, each of 1 hour duration and each of 20 marks, in a semester out of which the '**Better One out of Two**' shall be taken for computation of marks under SIA.
- v. If a student failed to secure pass marks in Mid Semester, he/she has to reappear in Mid & End Semester Examinations.
- vi. In case a student is fail to secure pass marks in End Semester Examination, then he/she has to appear only in End Semester Examination of following Sessions within period of Upper Limit of Four Years and the Marks of Mid Semester will be carried for the preparation of result.
- vii. Students' final marks and the result will be based on the marks obtained in Mid Semester and End Semester Examination organized taken together.
- viii. The pass marks in the programme will be 45% of the total marks obtained in each Core/ Elective/ Other Courses offered.
- ix. In absolute terms of marks obtained in a course, **a minimum of 28 marks is essential in the ESUE and a minimum of 17 marks is to be secured in the SIA** to clear the course. In other words, a student shall have to pass separately in the ESUE and in the SIA by securing the minimum marks prescribed here.
- x. Every candidate seeking to appear in the ESUE shall be issued an Admit Card by the University. **No candidate will be permitted to appear in the examination without a valid admit card.**
- xi. A candidate shall be permitted to proceed in next Semester (2nd, 3rd and 4th) **provided he/she has passed at least in 3 courses out of 5 courses** in the respective semester in theory and practical/ project courses taken together.
- xii. A student will have to clear all his papers within maximum of Four Years of duration to qualify for the degree.

However, it will be necessary to procure pass marks in each of the papers before completion of the programme.

VALUE ADDED COURSES

1. The Value added course will be of **2 credits** to be covered during the first semester.
2. There will be objective-type questions asked in the End Semester University Examination (ESUE).
3. There will be OMR-based examination and the correct answer is to be marked by a black ballpoint pen only on the OMR sheet provided by the University.
4. For **50 Marks Examination** the student will be provided **Two hours** for marking their responses.
5. Students are not allowed to choose or repeat courses already undergone at the undergraduate level in the proposed major and minor streams.
6. The performance in this course will not influence the SGPA or CGPA of the PG Programme where the student is registered to obtain the Master's Degree. However, it will be mandatory to secure minimum pass marks in the course before exit from the PG Programme.
7. If the student fails to secure the minimum pass marks in the Value added course in the first semester, he may appear in the examination of the said course with the following batch of the next session.
8. The student may appear in the examination of the said course further if could not clear the course in the following attempt, subject to the date of validation of the Registration.

The Regulations related to any concern not mentioned above shall be guided by the existing Regulations of the PG Curriculum of Ranchi University, Ranchi.

Level 6.5	Research	III	---	---	20	---	20
		IV	---	---	---	20	20
Total credits of P.G. Programme = 80							

Note: **Having Internship of 4 credits ‘Exit’ is allowed with awarding the PG Diploma Certificate.**

Implemented from Academic Session 2025-26 & Onwards

AIMS OF MASTER'S DEGREE PROGRAMME IN GEOGRAPHY

The aim of the Master's degree programme in Geography is to provide:

The 'Master of Arts in Geography' programme offered by the department, aims at empowering students with knowledge and skills for spatial thinking and analysis, to navigate real world problems, and contribute to society in a meaningful way. The aims of the course are to familiarize the students about geomorphic process, climatological characteristics, spatial variation of human societies and its features with integration of latest geo-spatial technologies such as GIS, Remote Sensing and GPS.

PROGRAMME LEARNING OUTCOMES

The broad aims of Master's degree programme in Geography are:

At the end of the two-year (four-semester) course, students will have comprehensive understanding of spatial variation of physical environmental features, human environmental features and features, factors developed because of interrelationship among them. The students will acquire knowledge about contemporary issues in geography, both physical and human geography.

The Courses in One Year P.G. Programme and in the Second year of Two years P.G. Programme are Common.

*** Either One Internship of 4 credits or Two Internships of 2 credits each is required before opting for the ‘Exit’ option after First year of the P.G. Programme.**

 INSTRUCTION TO QUESTION SETTER

SEMESTER INTERNAL EXAMINATION (SIE):

There **Marks Weightage of a Course:** Each non-practical/non-project course shall be of **100 marks** having two components: **70 marks shall be assigned to the End Semester University Examination (ESUE), conducted by the University, and, 30 marks for Sessional Internal Assessment (SIA), conducted by the Department/College.**

The marks of SIA shall further break into, 20 for Internal Written Examinations, 05 for Written Assignment/ Seminar presentation and 05 for overall performance of a student including regularity in the class room Lectures and other activities of the Department/College. There shall be two written internal examinations, each of 1-hour duration and each of 20 marks, in a semester out of which the **‘Better One out of Two’** shall be taken for computation of marks under SIA.

In absolute terms of marks obtained in a course, **a minimum of 28 marks is essential in the ESUE and a minimum of 17 marks is to be secured in the SIA to clear the course.** In other words, a student shall have to pass separately in the ESUE and in the SIA by securing the minimum marks prescribed here.

A. (SIE 20+5=25 marks):

There will be a uniform pattern of questions for mid-semester examinations in all the courses and of all the programmes. There will be **two** groups of questions in 20 marks written examinations. **Group A is compulsory** and will contain five questions of **very short answer type** consisting of 1 mark each. **Group B will contain descriptive type five** questions of five marks each, out of which any three are to be answered. Department may conduct Sessional Internal Examinations in other format as per needs of the course.

The Semester Internal Examination shall have two components. (a) One Semester Internal Assessment Test (SIA) of 20 Marks, (b) Class Attendance Score (CAS) of 5 marks.

Conversion of Attendance into score may be as follows:

Attendance Upto 45%, 1mark; 45<Attd.<55, 2 marks; 55<Attd.<65, 3 marks; 65<Attd.<75, 4 marks; 75<Attd, 5 marks.

END SEMESTER UNIVERSITY EXAMINATION (ESUE):**A. (ESUE 70 marks):**

There will be a uniform pattern of questions for all the courses and all the programmes. There will be **two** groups of questions. **Group A is compulsory** and will contain two questions. **Question No.1 will be very short-answer type** consisting of five questions of 1 mark each. **Question No.2 will be a short-answer type** of 5 marks. **Group B will contain descriptive type six** questions of fifteen marks each, out of which any four are to be answered. The questions will be so framed that examinee could answer them within the stipulated time.

[**Note:** There may be subdivisions in each question asked in Theory Examinations]

B. (ESUE 100 marks):

Practical/ Project courses would also be of 100 marks but there **shall be no internal written examinations** of the type specified above. The total 100 marks will have two components: **70 marks for the practical ESUE and 20 marks for the Viva-voce examination** conducted during the ESUE to assess the applied and practical understanding of the student.

The written component of the project (**Project Report**) shall be of **70 marks and 20 marks will be for the Viva-voce examination** jointly conducted by an external examiner, appointed by the University, and the internal supervisor/ guide.

10 marks will be assigned on the cumulative assessment of the examinee during the semester and will be awarded by the department/faculty concerned.

SEMESTER I

I. FOUNDATION COURSE SOCIAL GEOGRAPHY

[FCGEO101]

Marks: 30 (MSE: 20 Th. 1Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100	Pass Marks: (MSE: 17 + ESE :28) = 45
---	--------------------------------------

(Credits: Theory-04, 60 Hours)

Course Objective:

The Learning objective of this course are as follows-

1. To familiarize the about social geography, its concept, nature and scope; migration social categories
2. To make students learn about Tribal geography and its concepts; Tribes and their economic activities, marriage, faith and practices

Learning Outcomes:

After the completion of course, the students will have ability to:-

1. Understand the nature, scope and relationships of geography and human wellbeing
2. Acquire knowledge on spatial dimensions of social diversity components
3. Understand the contemporary social issues of India and the world

Course Content:**Unit 1-** Nature, scope, and content of Social Geography; Social structure: caste and class. Social process: Urbanization, industrialization, and migration; Social differentiation and region formation**Unit 2-** Social indicators of development: Education and health; Concepts of social justice and social security with examples from India**Unit 3-** Contemporary social issues: Gender related problems; Social problems in urban areas: Poverty, Inequality and crime;**Unit 4-** Social problems in rural areas: Marginalization and deprivation;**Unit 5-** Social welfare schemes for tribes, women, and children; Social segregation: A comparison between cities of global north and south**References**

II. CORE COURSE ADVANCED GEOMORPHOLOGY

[CCGEO102]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective:

The Learning objective of this course are as follows-

1. To familiarise students about geomorphic environment, landform development
2. To make student learn and apply geomorphic ideas for water management and environmental degradation

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Learn the geomorphic/ physical environment of the area. It will help in the understanding of geomorphic analysis of landform development
2. Have sound knowledge of geomorphic features which will enable the students in application of geomorphic ideas for water management and environmental degradation
3. It will help the understanding of natural hazard management and various geomorphic applicability

Course Contents-

Unit 1- Defining the field, nature and scope of geomorphology, fundamental concepts, landform evolution, Slope Development and theory

Unit 2- Earth movements- Epierogenic, Orogenic and Cymatogenic, climatogenic, Continental Drift and plate tectonic and anthropogenic evolution of landforms

Unit 3- Process of landform evolution – concept of gradation, drainage system analysis, morphometric analysis, drainage basin, and channel morphology,

Unit 4- Regional geomorphology of Chotanagpur plateau, Palamu upland, Rajmahal upland, Kolhan Region and denudation chronology

Unit 5- Applied Geomorphology- application of geomorphology to urbanization, agriculture, water resource management, watershed planning and development forestry, regional planning and development, Geomorphic hazard

III. CORE COURSE RESEARCH METHODOLOGY

[CCGEO103]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective:

1. To understand essential of research in Geography and its significance.
2. To understand the ways data are collected, classified tabulated and analysed.
3. To make student aware about fundamentals of sampling techniques in Geographic research.

Course Learning Outcomes:

1. Acquaintance with basics of research its typology and conceptualization of research problem
2. Understanding of sources, types and tools of data collection and data analysis
3. Understanding nuance of thesis writing in Geography.

Course Content:

Unit-1- Introduction to Research Methodology: Defining Research, Methods of Research Types, Significance of Geographical Research, Research Ethics; Scientific Method in Geographical Studies, Inductive and Deductive, Basic Element and Attributes, Scale of Research, Macro, Meso, Micro Problem of Formulation and Identification; Review of Literature: Significance and Sources of Literature Review; Research Design: Meaning, Stages, Characteristics, Significance of Research Design.

Unit-2- Research Hypothesis and Sampling: Meaning of Hypothesis, Relevance and Types of Hypothesis; Identification of Problem and Hypothesis, Problem Identification, Testing Hypothesis, Generalization; Sampling: Meaning and Importance, Types of Sampling; Selection of Sample and size of Sample.

Unit-3- Nature and Analysis of Geographical Data: Nature and Types of Geographical Data, Significance of Spatial and Temporal Data in Geographical Studies; Levels of measurement: Nominal, Ordinal, Ratio and Interval; Methods and Sources of Geographical Data Collection, Conventional and modern limitation of secondary data and need for data generation, collection of primary data: questionnaires and schedules, fieldwork, Sample surveys and their significance.;

Unit-4- Geographic data analysis: Quantitative, Qualitative and advanced techniques of Geomorphic data processing and analysis, Geographical matrix and its significance in analysis of geographic data.

Unit-5- Scientific Report Writing- Introduction: Aim and Objective, Data and Methodology; Data Analysis, Result and Conclusion.; Referencing System, Webliography and Bibliography; Plagiarism Design, Concept of Impact Factor, Citation, DOI

IV. CORE COURSE CLIMATOLOGY AND CLIMATIC CHANGE

[CCGEO104]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective:

The Learning objective of this course are as follows-

1. To familiarise students about elements of weather and climate
2. To make student learn about winds, cyclone, and climatic change
3. To make student learn about air mass and fronts

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the elements of weather and climate
2. Understand working of winds, cyclone systems and climatic changes
3. Understand the concept of air mass, fronts

Course Contents-

Unit 1: Definitions, nature, scope of Climatology. Elements of weather and climate. Origin, Composition and Structure of atmosphere. Temperature: Solar radiation principles, Greenhouse effects, Horizontal and Vertical distribution of temperature & inversion of temperature. Global warming.

Unit 2: Atmospheric Pressure: Pressure Gradient, Coriolis Effect, Horizontal and vertical distribution of Air Pressure and Pressure Belts. Winds: Planetary, Monsoons, Local Winds, Jet Streams. Mechanism of monsoon. El-Nino and La Nina phenomena, El-Nino-Southern Oscillation (ENSO).

Unit 3: Air masses: Definition, Nature, Source Region, Classification of air masses. Fronts - Frontogenesis and Frontolysis, Classification of fronts, Cyclones: Tropical Cyclones & Temperate Cyclones - Origin, types, structure and distribution.

Unit 4: Classification of World climates: Koppen's & Thornthwaite classification. Climatic changes, Weather forecasting, Problems and prospects of weather forecasting in India.

Unit-5:- Overview of Climatic Change: Causes, trends, impact and predictions of global temperature rise since 1850 CE. Formation, depletion, restoration and significance of ozone layer.

**V. CORE COURSE
PRACTICAL-I**

[CPGEO105]

Marks: 100 (ESE Pr: 6 Hrs) = 100

Pass Marks = 45

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter forEnd Semester Examination (ESE Pr):

There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:

Experiment/Lab work	= 70 marks
Practical record notebook	= 05 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:**Course Objective:**

The Learning objective of this course are as follows-

1. To familiarise students about drainage density, drainage texture and stream ordering
2. To make student learn and apply methods of soil testing, planning of satellite and garden town

Course Learning Outcome:

After the completion of course, the students will have ability to:

1. Estimate the soil quality such as soil pH, macro nutrients, identification of soil problems and management.
2. Understand stream ordering techniques, calculation of bifurcation ratio.
3. Evaluate the traffic flow through diagrams, water budget, rainfall dispersion

Course Content:

Unit 1- Stream Ordering (Strahler's, Shreve, Horton, Shiedeger's,) Bifurcation ratio, Drainage Density, Drainage Texture, Thalweg, Channel Profiles, Hypsometric Curve, Area-height Diagram, Profiles, block Diagram: Non-perspective, perspective: one point perspective, two-point perspective, multiple section method, layer method

Unit 2- Study of Soil P_H Value, Nitrogen Content, Phosphorous and Construction of Soil Profiles.

Unit 3- Spherical Diagram, Isopleth, Volumetric or Sten de Geer's method, Traffic Flow Diagram. Regional Pattern of Urbanisation, Planning of Satellite and Garden Town

Unit 4- Water Budget, Rainfall Dispersion Diagram, Ergo graph, Climatograph

Practical Record- exercise on each topic above

SEMESTER II

**I. CORE COURSE
HYDROLOGY & WATERSHED MANAGEMENT**

[CCGEO201]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100**Pass Marks: (MSE: 17 + ESE: 28) = 45****(Credits: Theory-04, 60 Hours)****Course Objective:**

The Learning objective of this course are as follows-

1. To familiarise students about nature, scope and significance of hydrology
2. To make student learn about soil development, hydrological cycle, surface and ground water and its management

Course Learning Outcome:

After the completion of course, the students will have ability to:

1. Study the soil as a basic resource, focusing its distribution, problems and management.
2. Understand the basic components of hydrological cycle and comprehend practices of integrated watershed management.
3. Evaluate the water balancing and river basin and water disputes

Course Contents-**Unit 1-** Definition and scope of hydrology, importance of water, hydrological cycle, water storages – glaciers, river channels, lakes and reservoirs, soil moisture;**Unit 2-** Ground water: characteristics of stream flow, Darcy's law, permeability, infiltration, ground water storage, ground water aquifers in different rock systems, movement and discharge. Water Crisis: a Case study- rural or urban, water management: ground water and surface water**Unit 3-** concept and demarcation of watershed, their utility as units of hydrological environmental and landuse planning and management; Water conservation: Micro- Catchment, Watershed harvesting, evaporation separation, and seepage reduction, supplemental irrigation, Ground water recharge, afforestation.**Unit 4-** Preparation of Watershed developmental plan, administrative arrangement and agency selection for plan implementation, monitoring, and evaluation system, Management of Soil erosion: over land flow and gullies**Unit 5-** Programmes on Watershed Management: Government of India Guideline on Watershed development, Watershed based rural development and the role of NGO in watershed management**References:**

II. CORE COURSE REGIONAL PLANNING AND DEVELOPMENT

[CCGEO202]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective

The Learning objective of this course are as follows-

1. To familiarize the concept of Region and regional planning, Its need and techniques
2. To make students learn about the theories and models for regional planning, Indicators of development, Multi-Purpose Projects

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Identify notable lagging regions and solutions for their overall development
2. Have comprehensive understanding regarding the different regions and application of different models and theories for integrated regional development.
3. Select appropriate indicators for the measurement of socio-economic regional development

Course Content:

Unit 1- Concept of Region, Types, hierarchy, characteristics and delineation of Regional planning, Geography of regional planning, concept, scope, methods, techniques and need of regional planning. Regionalization of India for Planning (Agro Ecological Zones)

Unit 2- Theories and Models for Regional Planning: Growth Pole Model of Perroux; Growth Centre Model in Indian Context; Myrdal, Hirschman, Rostow and Friedmann; evaluation of regional disparities/imbbalances, method of measuring imbalances

Unit 3- Concept of Development, Indicators of development, problems and issues of development, planning process-sectoral, multi-level, decentralized planning

Unit 4- Integrated area development (IADP), planning tribal and hill areas, draught prone areas, command areas in watershed, Border area development, Urban Green belt, Planning for metropolitan region

Unit 5- Niti Ayog, Policy and framework; backward regions: identification and its development- a case study- Dandakaranya, North-East region; Multi-Purpose river valley projects- Damodar, Sardar Sarovar Project

III. CORE COURSE POLITICAL & ELECTORAL GEOGRAPHY

[CCGEO203]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective

The Learning objective of this course are as follows-

1. To familiarize the concept of Political Geography and Geopolitics
2. To make students learn about the Geo-Strategic views
3. To make student understand about Electoral Geography, its concepts and spatial factors

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Learn the concept of nation and state and geopolitical theories
2. Understand the different dimensions of electoral geography and resource conflicts
3. Have sound knowledge of geopolitics and Political Geography of India

Unit-1- Definition, Nature and Scope; Geography, Politics, Geopolitics & Political Geography; History and Development of political Geography; Approaches to the Study of Political Geography; Evolution of the Modern State; Organization & Structure of State or National Political System.

Unit-2- Concept of Nation, State and Nation- State; Geographic Characteristics of States: Size, Shape, Location, Cores and Capitals, Nation Building, Nationalism; Definition of Frontier and Boundaries; Distinction Between Frontier and Boundaries;

Unit-3- Global Geo-Strategic Views: Mahan, Mackinder, Spykman & Seversky with other Views Related to Heartland and Rimland; Cohen's Views; Unitary and Federal Forms of Governance.

Unit-4- Political Geography of India; Resource Development & Power politics; India's Neighbours & Geopolitical Study of Indian Ocean; Political geography of SAARC Region; Changing Political Map of India and Inter-state Disputes Related to Language and Others; Problems of Border States of India; and Emergence of New States & their Demands

Unit-5- Electoral Geography: Concept, Definition, Scope; Types of Electoral Systems; Electoral views: Spatial organization of election, relationship with demographic characteristics, influence of environment and spatial factors on voting decisions, spatial variations in power and policy implementation, geography of voter participation, behavioral model of voting

IV. CORE COURSE
NATURAL RESOURCE MANAGEMENT

[CCGEO204]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100	Pass Marks: (MSE: 17 + ESE: 28) = 45
--	--------------------------------------

(Credits: Theory-04, 60 Hours)

Course Objectives:

On completion of this course, the students will be able to understand:

1. Concepts of Natural resources, their significance and classification
2. Resource distribution, conflict and management
3. Significance of human resource and their issues

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Classification of Natural resources and their significance
2. Metallic and non-metallic minerals and their distribution
3. Significance of human resource, sustainable utilization of resources

Course Content:

Unit 1- Natural Resources- concept, significance and classification. Approaches to resource utilization: Utilitarian, conservational, community based and adaptive. Crisis of resource availability: Global scenario of Forest and water, Minerals. Overview on conservation of forest and water resources.

Unit-2- Resource conflict and management: Agricultural resources conflicts: issues and productivity and resilience of indigenous species and genetically modified crops. Distribution, utilization and management of metallic mineral resources, Iron ore, bauxite and copper.

Unit-3- Distribution, utilization, Problems and management non-metallic mineral resources- Limestone, Mica, and Gypsum

Unit-4- Significance of human resource: issues related to capability development. Limits to growth and sustainable use of resources with reference to sustainable development goals.

Unit-5- Sustainable utilization, conservation and management of resources; Jharkhand's natural resource: Minerals, water and forest, Government policy of natural resource conservation and management. Resources utilization and environmental depletion in Jharkhand.

**V. CORE COURSE
PRACTICAL-II**

[CPGEO205]

Marks: 100 (ESE Pr: 6 Hrs) = 100

Pass Marks = 45

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter forEnd Semester Examination (ESE Pr):

There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:

Experiment/Lab work	= 70 marks
Practical record notebook	= 05 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:**Course Objective**

The Learning objective of this course are as follows-

1. To develop and expose students to an extensive field survey of wider region of India.
2. To make students identify various physical landforms, processes, and their impact on human and biological world

Learning Outcomes:

After the completion of course, the students will have ability to:

1. to conduct an extensive survey of a contiguous wider region of India
2. identify salient landforms, their genesis and their impact on human life, flora and fauna.
3. Carrying out extensive field study outside the class room

Unit 1: Trace the prominent features of the area to be surveyed. Identify the salient landform features of the selected area on a topographical sheet.

Unit 2: Identify the landforms on the surface, while in the field. Also note the agents of erosion, transportation and deposition associated with the landforms.

Unit 3: Identify and classify the biodiversity in the area (Flora and Fauna).

Unit 4: Observe the relationship of various landforms, flora and fauna with land use, settlement, structure and life style of the people.

Note:

1. Departmental council will decide the physical survey area based on broad geomorphic and distinct region (Mountainous, Hilly, Coastal, Deltaic, Forest, Desert areas) for at least Five-Ten (5-10) days.
2. University/College will provide the requisite fund for physical survey
3. It is mandatory to all the students to participate in the physical survey.
4. Based on observations of the above characteristics, prepare a field survey report. The report need to be supplemented with maps, sketches, diagrams and photographs etc.
5. The practical exercises should aim at identification of micro-geomorphic features on the ground and their relationship to land use/settlement pattern. This is also a training in Report Writing.
6. Two written questions in the practical examination based on the physical survey report-
 - a. writing method
 - b. physical survey

SEMESTER III

I. CORE COURSE INDIAN KNOWLEDGE SYSTEM (IKS) IN GEOGRAPHY

[CCGEO301]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100	Pass Marks: (MSE: 17 + ESE: 28) = 45
--	--------------------------------------

(Credits: Theory-04, 60 Hours)

Course Objectives:

On completion of this course, the students will be able to understand:

1. This course will make students aware of Indian knowledge traditions and their connection with Geography.
2. Contribution of Indian knowledge system in Geography.

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Application of Principles of Indian knowledge system to modern Geography.

Course Content:

Unit 1- Ancient Geography: Ancient Indian texts mentioned information about Geography, Such as knowledge about rivers, mountains, climate, Astronomy, origin of the Universe, Nakshatra and season.; Geomorphology: Indian Principles of Geomorphology and their application, such as course of river, earthquake, Volcanoes.

Unit 2- Climatology: Indian principles of climatology and their effects, such as rainfall, seasons, temperature extreme, climatic phenomena, weather forecasting, Nakshatra used rainfall and cultivation.

Unit 3- Population and Settlement: Contribution of the Indian knowledge system to population and settlement Geography, such as growth of villages and towns, town planning architectures, social organization and trade Indus valley civilization.

Unit 4- Environmental Geography: Contributions of Indian knowledge system to environmental Geography, such a forestry, agriculture, water management, dairy and animal husbandry land use planning, tenure and tenants.

Unit 5- Tribal and Cultural Geography: Contribution of tribal cultures their livelihood, Sustainability to environment, food habits, rituals and habitat; Rich cultural heritage of India, pilgrimages, Religious tourism, and geo-tourism, temples; Indian Contribution to Geography: The universe, Akshansh and Deshantra, Earthquakes (Bhukampa) Atmosphere, weather and climate Geography, Dwipas, contribution of Varahamihira, Brahmagupta, Bhaskaracharya, Aryabhata.

II. SKILL ENHANCEMENT COURSE ENVIRONMENT GEOGRAPHY AND DISASTER MANAGEMENT

[ECGEO302]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objectives:

On completion of this course, the students will be able to understand:

1. Atomic theory and its evolution.

Learning Outcome:

After the completion of course, the students will have ability to:

1. Gain a perspective of disasters and various dimensions of disaster management
2. Have comprehensive knowledge of various natural and manmade disasters in India
3. Examine the response and mitigation measures of disasters

Course Contents:

Unit 1- Environmental Geography: Concepts and Approaches; Ecosystem – Concept, Structure and Functions; Study of the Geographic distribution of organisms and Ecosystem, Ecology and Evolution; Ecological successions: stages and climax; Basic Principles of Ecology and Evolution. Man-Environment Relationship in Equatorial, Desert, Mountain and Coastal Regions

Unit 2- Environmental Problems and Management: Air Pollution; Solid and Liquid Waste; Biodiversity Loss, Environmental Programmes and Policies – Global, National and Local levels,

Unit-3- Hazards and disasters: Meaning, concepts, method and approaches; Elements of Disaster management,

Unit-4 Disaster management: Earthquake, Tropic Cyclone Disaster, Landslide, Flood Hazards, Drought and famine; Localized weather related hazards; Biological and Health hazards, Anthropogenic Disasters; Man-Induced erosion and sedimentation; Global warming and climatic change

Unit-5- Disaster mitigation Programme- Institutional organization and policy framework of disaster management in India: - Disaster management in India- Histogenesis, NDMA, National Policy on Disaster Management, Disaster management act; disaster management strategies, mitigation and prevention; Disaster response, Relief and rehabilitation; Disaster management and environmental laws, National Forest Policy of India, Economic and financial aspect of disaster management

III. CORE COURSE TRANSPORT AND TOURISM GEOGRAPHY

[CCGEO303]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective:

The Learning objective of this course are as follows-

1. To familiarize the about cultural geography, its concept, nature and scope; migration social categories
2. To make students learn about Tribal geography and its concepts; Tribes and their economic activities, marriage, faith and practices

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the nature, scope and relationships of geography and human wellbeing;
2. Acquire knowledge on spatial dimensions of cultural diversity components;
3. Understand the aspects of Tribal geography and tribal socio-economic characteristics

Contents:

Unit- I Nature, scope, significance of and Development of Transport Geography, factors of Development: Physical, Economic, Social, Economic and transport and regional Modes development, relative significance of transport (railways, roadways, Waterways).

Unit- II Accessibility and flow models; network structure, measurement of accessibility, Models of network change, Function, pattern of movement and transport Development.

Unit- III Nature, scope and extent, concept of tourism, Relationship between geography and Tourism, Eco- tourism, Geo-tourism, Agro-tourism, Heritage Religions tourism and Adventure tourism.

Unit-IV Types of tourism- Domestic and the international, Adventure, wildlife, Pilgrimage, Business, Leisure, Pleasure, and cultural tourism, Local, National and international, Socio-Economic impact of tourism.

Unit-V Infrastructural approach for the development of tourism, Govt. policies for Planning and Promotion of tourism in India, prospect and manning of tourism in India. Case studies: Hill Station – Mount Abu, Shimla, Ooty, Beach points- Kwalum, Goa and Mariano Beach, Historical Centre – Mysore, Jaipur, Delhi, Religious- Puri, Deoghar Tirupati, Kedarnath, Mahakal (Ujjain); Dams- Tehri, Hirakud, Masanjor National Parks-Palamu Tiger reserve, Kaziranga and Gir.

IV. CORE COURSE CULTURAL AND TRIBAL GEOGRAPHY

[CCGEO304]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective:

The Learning objective of this course are as follows-

3. To familiarize the about social geography, its concept, nature and scope; migration social categories
4. To make students learn about Tribal geography and its concepts; Tribes and their economic activities, marriage, faith and practices

Learning Outcomes:

After the completion of course, the students will have ability to:-

4. Understand the nature, scope and relationships of geography and human wellbeing;
5. Acquire knowledge on spatial dimensions of social diversity components;
6. Understand the aspects of Tribal geography and tribal socio-economic activities

Course Content:

Unit 1- The Nature Meaning & Scope of Cultural Geography. The evolutionary approach in cultural geography. The Framework of cultural Geography. The evolution of cultural Geography-The contribution of Otto Schluter and Carl Sauer

Unit 2- Cultural Geography: Elements & Components; Cultural Areas & Cultural Realm. Environment and Culture: Concept of cultural areas and cultural regions.

Unit 3- Cultural adaptation and Environmental perception. . Focus on similarities and differences of various cultures with respect to racial, religious, linguistic, and demographic, characteristics in Indian context.

Unit 4- Tribal Geography- meaning, concept, and scope of tribal geography; Tribes and their habitat- Geographical distribution of Indian tribes, groups and sub-groups; Economic activities; Socio- Political Organization- Family, Marriage and kinship, faith, beliefs and practices,

Unit 5- Tribal rights- Land, forests, water; Emerging social problems- Health and education, malnutrition, illiteracy, Alcoholism; Industrialization and tribe, mining and tribes, displacement

**V. CORE COURSE
PRACTICAL-III**

[CPGEO305]

Marks: 100 (ESE Pr: 6 Hrs) = 100

Pass Marks = 45

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter forEnd Semester Examination (ESE Pr):

There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:

Experiment/Lab work	= 70 marks
Practical record notebook	= 05 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:

INSTRUMENTAL SURVEY

Course Objective:

The Learning objective of this course are as follows-

1. To familiarise students about various Instruments, methods, tools and techniques of ground survey
2. To make student learn and apply project development,

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Understand the importance of field work, types of survey and application of instruments for leveling
2. Handle and apply the instrument to measure height, spot height determination techniques
3. Synthesis and develop the idea of project work on the basis of secondary and primary survey.

Course Content:

Unit 1: Importance of field work, Scope and purpose, Types of survey, Principles and applications of selected survey instruments, Plane Table, Plan preparation, Resection method: two point problem, three point problem, Tracing paper method.

Unit 2: Prismatic Compass: Open and closed traverse, elimination of error by Bowditch Rule. Other smaller instruments: Sextant, Abney Level and Indian Clinometer. Dumpy Level: Traverse Survey, Spot height determination and contour plan preparation,

Unit 3: Theodolite: horizontal and vertical (height) measurement, Accessible and inaccessible method. Survey of selected area, Preparation of base map by the use of surveying instruments.

Unit 4: Measures of Central Tendency, Dispersion, Skewness, Kurtosis, Moments, Correlation, Regression.

SEMESTER IV

I. ELECTIVE COURSE-A AGRICULTURAL GEOGRAPHY

[ECGEO401A]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100	Pass Marks: (MSE: 17 + ESE: 28) = 45
--	--------------------------------------

(Credits: Theory-04, 60 Hours)

Course Objectives:

On completion of this course, the students will be able to understand:

1. Nature, scope and development of agriculture geography
2. Determinants of agricultural land use, cropping pattern, theories of agricultural location

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Land reforms, land use policy and planning
2. Classification of agricultural regions, agro-climatic regions of India

Course Content:**Unit 1:** Nature and scope, Significance and development of agricultural geography, Approaches to the study of agricultural geography, Origin and dispersal of agriculture, Sources of agricultural data.**Unit 2:** Determinants of agricultural land use – Physical, economic, social and technological, Land holding and land tenure systems, Land reforms, Land use policy and planning, Cropping pattern, Intensity of cropping.**Unit 3:** Theories of agricultural location based on several multi-dimensional factors, Von Thunen's model and its recent modifications, Whittlesey's classification of agricultural regions, Agro-climatic regions of India.**Unit 4:** Agriculture in India – Land use and shifting cropping pattern, New trends in Indian agriculture, Green Revolution, White Revolution, Blue Revolution, Problems of Indian agriculture, Agricultural Policy of India.**References:**

OR ELECTIVE COURSE-B
REMOTE SENSING AND GIS

[ECGEO401B]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100	Pass Marks: (MSE: 17 + ESE: 28) = 45
--	--------------------------------------

(Credits: Theory-04, 60 Hours)**Course Objective:**

The Learning objective of this course are as follows-

1. To explain the meaning, concept, and definition Remote sensing and GIS, as an important tool in the study and explaining geographic phenomenon
2. To familiarise students about satellite remote sensing, data processing and interpretation, classification
3. To aware students about use of GPS and GIS, its principle, working mechanism and applications

Course Learning Outcomes:

After the completion of course, the students will have ability to:

1. Appreciate the strength and application of remote sensing and GIS
2. Map the resources, their location and availability
3. Apply this knowledge for sustainable development

Course Content:

Unit 1: Stages in remote sensing data acquisition; physics of remote sensing; electromagnetic spectrum (ems); EMR and its interaction with atmosphere and earth surface features.

Unit 2: Remote sensing - platforms: types and their orbital characteristics; sensors types: active and passive; sensors systems: whiskbroom and push broom; satellite series: IRS, SPOT, IKONOS and Quick Bird.

Unit 3: Digital image processing: digital data formats; image restoration: geometric, radiometric, and atmospheric corrections; Filtering; Image enhancement: linear and nonlinear, contrast stretch; band combinations; image classifications: supervised and unsupervised.

Unit 4: Geographic information system and global positioning system:

Components of GIS; Data Structures; Data Base Management System (DBMS); Data Models; spatial data analysis and applications; Fundamentals of GPS; Segments of GPS; GPS Applications.

OR ELECTIVE COURSE-C
URBAN GEOGRAPHY

[ECGEO401C]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)**Course Objective:**

The Learning objective of this course are as follows-

1. To familiarise students about Urbanization, its patterns and theories
2. To make student learn about urban functions, urban sprawl, urban renewal-policies, Master plan

Course Learning Outcome:

After the completion of course, the students will have ability to:

1. Understand the fundamentals and patterns of urbanization process
2. Learn the functional classification of cities and Central Place Theory
3. Know about policies of urban development of India

Course Content:

Unit 1: Nature and scope of Urban Geography-Definition of Urban Settlements (Towns, Cities and Metro etc.), Attributes of urban places during ancient, medieval and modern period, Classification of urban settlements on the basis of size and function, Urban growth and theories, Central Place theory of Christaller and Losch, Contribution of Indian scholars to the studies of urban settlements.

Unit 2: Urban Population Density and Land Value Curves- Urban Land Use – Vertical and Horizontal Growth of Cities, Concentric, Zonal and Multiple Nuclei Theories of Urban Structure.

Unit 3: Urban Functions- Basic and Non-Basic- Urban Hierarchy- Rank-Size Rule – Central Place Theory – Functional Classification of Towns by C.D. Harris and H.J. Nelson. Urban Issues & Challenges: Water supply, traffic congestion, solid waste, smog, sewage and drainage system.

Unit 4: Concept of City, Region and Urban Hinterland – Urban Sprawl- Urban Slums – Urban Crimes and their Trends with reference to India- Concept and Issues of Peri-Urbanization. Elements of Urban Planning – Urban Renewal – Policies of Urban Development in India – Master Plans of Ranchi City.

**II. ELECTIVE COURSE-A
SOIL GEOGRAPHY**

[ECGEO402A]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100**Pass Marks: (MSE: 17 + ESE: 28) = 45****(Credits: Theory-04, 60 Hours)****Course Objectives:**

On completion of this course, the students will be able to understand:

1. Significance of soil geography
2. Soil forming factors, process of soil formation and soil development
3. Physical properties of soil, texture, air, temperature and other properties

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Spatio-temporal dimensions of soil formation
2. Soil organisms, soil erosion, degradation and conservation
3. Evaluation of land and soil

Course Content:

Unit 1: Nature, scope and significance of Soil Geography; its relationship with Pedology, Soil forming factors: parent material, organic, climatic, topographic, Spatio-temporal dimensions, Processes of soil formation and soil development: Physical, Biotic and Chemical. Soil profile.

Unit 2: Soil organism, macro-animals (earthworms, sowbugs, mites, centipedes, rodents and insects), Micro-animals and plants-Nematodes, Protozoa, Rotifers, Fungi, Bacteria, algae and Actinomyces.

Unit 3: Physical properties of soils: Morphology, Texture, Structure, Water, Air, Temperature and other properties of soil, Chemical properties of soil and soil reaction, Soil erosion, Degradation and Conservation

Unit 4: Evaluation of land and soil: Parametric and non-parametric systems, Land capability classification, Soil reclamation and management: soil survey and landforms in environmental management, Sustainable development of soil resources with reference to India.

OR ELECTIVE COURSE-B

[ECGEO402B]

APPLICATION OF REMOTE SENSING & GIS

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)**Course Objectives:**

On completion of this course, the students will be able to understand:

1. Application of remote sensing and GIS in natural resource monitoring and management
2. Application of Geo-spatial tools in Agriculture, environmental monitoring, Hazards and disaster management
3. Application of remote sensing in Urban planning and land use planning

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Concept and classification techniques of land use land cover
2. Application of remote sensing and GIS in urban planning

Course Content:

Unit-1- Application of remote sensing for natural resources monitoring and management: Geomorphology and structural mapping; Fluvial mapping, Drainage network and patterns, description and analysis of landforms, water resources mapping, land use, land cover and urban sprawl//mapping

Unit-2- Application in agriculture: content of moisture in the soil, determining crop types and classifications, crop condition assessment, crop damage and progress, water content determination, mapping soil; management and crop health

Unit-3- Application in Environment monitoring and management: Land Use Land Cover change, environmental impact assessment, biodiversity conservation

Unit-4- Application in hazards and disaster management: hazard assessment, vulnerability assessment (Degree of loss of population), building infrastructure, economic activities, risk assessment; quantifying number of lives, cost damage to property, preparation of map

Unit-5- Application in urban planning: land use pattern, Green zones, Residential areas, coastal cities Disasters and transport planning

OR ELECTIVE COURSE-C
RURAL DEVELOPMENT

[ECGEO402C]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objective

The Learning objective of this course are as follows-

1. To familiarise students about the rural development, and its concept
2. To make student learn about programme and plans for the development of rural development

Learning Outcomes:

After the completion of the course, the students will have the ability to:

1. Appreciate the concepts, needs and various approaches to rural development;
1. Understand the strong economic bases of rural areas of India;
2. Appreciate the area based and target group based approaches and provision of services to rural development.

Course Content:

Unit-1- Rural Development: Definition types, areas, parameters, progress and development, Development and growth, development and change, indicators of development. Theories of Rural Development: Economic theory, welfare theory, quality of life theory, human rights theory, sustainable development theory, LPG theory, Gandhian Concept of Rural Development. Models of Rural development: Agriculture labour, skill and education development, local self-governance, Panchayati Raj

Unit-2- Rural Livelihood and Resources: Livelihood- Types, Approach- meaning and principles, livelihood framework, assessment of livelihood reality, livelihood policy and programmes. Resource- Resources-ownership, Access and use- Rural environment: Environmental conservation, Climatic change and its impact on Rural livelihood.

Unit-3- Rural Development Programmes in India: History of Rural Development Programmes, Changing model and approaches of Rural Development Programmes in different plan period, , Barrier of Rural Development Programmes, Cultural, Social Geographical educational, Communications.

Unit-4- Evaluation of Rural Development Programmes- MNREGA, PMGSY, SJSY, Jan Dhan Yojana, Millets Mission

III. CORE COURSE MINING AND INDUSTRIAL GEOGRAPHY

[CCGEO403]

Marks: 30 (MSE: 20 Th. 1 Hr + 5 Attd. + 5 Assign.) + 70 (ESE: 3 Hrs) = 100

Pass Marks: (MSE: 17 + ESE: 28) = 45

(Credits: Theory-04, 60 Hours)

Course Objectives:

On completion of this course, the students will be able to understand:

1. Distribution of economic mineral, mineral deposits
2. Origin, occurrences and formation of mineral deposits
3. Concept of Industrial geography, trends of industrialisation, problems and prospects in Jharkhand

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Process of mineralization, magmatic concentration
2. Mineral extraction, conservation, trade and sustainable development in Jharkhand

Course Content:

Unit-1- Mining Geography: Concept, Definition and scope, Distribution of economic mineral, regional surveying mineral deposits, investigation and exploitation

Unit-2- Origin, Occurrences and formation of mineral deposits: origin of minerals, mineral thermometer, process of mineralization, magmatic concentration, contact metasomatism, Hydro thermal process, Cavity filling and metasomatic replacement; residual and mechanical concentration, sedimentation, oxidation and secondary processing, metamorphism and sublimation

Unit-3- Origin of some important metallic (Iron, Gold, Platinum, Silver, Lead, Zinc and Nickel; Non Metallic- Coal, petroleum; Granite quarries and sand mining, causes and consequences of mining; Mineral exploitation, Conservation, Trade and sustainable development in Jharkhand

Unit-4- Industrial Geography: meaning, nature and scope, industrial growth in India and Jharkhand, present trends of industrialization in Jharkhand. Bases of Industrial development in Jharkhand- a case study of important industry- Iron ore, Manufacturing; Footloose industry

Unit-5- Industrialization- causes and consequences, Industrial regions, Industrial revolutions, problems and prospects of Industrialization in Jharkhand, trends and trade of Industrial products, industrialization and sustainable resource development

IV. ELECTIVE COURSE-A PRACTICAL-IVA

[EPGEO404A]

Marks: 100 (ESE Pr: 6 Hrs) = 100

Pass Marks = 45

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter forEnd Semester Examination (ESE Pr):

There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:

Experiment/Lab work	= 70 marks
Practical record notebook	= 05 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:**SOIL GEOGRAPHY****Course Objectives:**

On completion of this course, the students will be able to understand:

1. Land capability, agricultural efficiency, cropping intensity
2. Soil profiles, composition of soil
3. Stream ordering, drainage density

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Crop combination, Cropping intensity
2. Finding stream order, soil pH and soil nutrients

Course Content:**Unit 1:**

Land capability, Agricultural Efficiency, Cropping Intensity. Crop Combination.

Unit 2:

Study of Soil pH Value, Nitrogen Content, Phosphorus and Construction of Soil Profiles.

Unit 3:

Stream Ordering, Drainage Density, Drainage Texture, Thalweg, Channel Profiles, Hypsometric Curve, Area-height Diagram.

Unit: 4

Water Budget, Rainfall Dispersion Diagram, Ergo graph, Climatograph.

Pass Marks = 45

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter for**End Semester Examination (ESE Pr):**

There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:

Experiment/Lab work	= 70 marks
Practical record notebook	= 05 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:**REMOTE SENSING AND GIS****Course Objectives:**

On completion of this course, the students will be able to understand:

1. Satellite image analysis, recognition of elements and interpretation keys
2. Creation of spatial data- vector data model
3. Using GPS, finding location, tracking

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Creation of point, line and polygons to represent geographical features
2. Linking spatial and non-spatial data, creating map layout
3. Finding location, marking waypoints or location of GPS

Course Content-

Unit 1: Image analysis: Principles of visual image interpretation, recognition elements and interpretation keys for visual interpretation (Shape, size, colour, tone, texture, association), Interpretation of Satellite Image (Landsat, LISS III, LISS IV, Cartosat etc.)

Unit 2: Photographs Identification of Spatial Data: point, line and Polygon Features, Representation of Spatial Features: Raster and Vector Data Model, Data Structure, Overlay analysis, Change Analysis and Buffer Analysis.

Unit 3: Introduction GIS Software, Geo-referencing and Projection Spatial data entry, editing, query building and executing, Topology creation and linking spatial and non-spatial data, Spatial data visualization and output Map Generation.

Unit 4: Introduction to GPS, Finding latitude, longitude and altitude, Tracking in GPS, Routing in GPS.

(Credits: Practical-04, 120 Hours)

Instruction to Question Setter for**End Semester Examination (ESE Pr):***There will be one Practical Examination of 6Hrs duration. Evaluation of Practical Examination may be as per the following guidelines:*

Experiment/Lab work/Case study	= 50 marks
Practical record notebook	= 25 marks
Attendance	= 05 marks
Viva-voce	= 20 marks

Practicals:**URBAN- RURAL GEOGRAPHY****Course Objectives:**

On completion of this course, the students will be able to understand:

1. linear and exponential growth rate of population.
2. Traffic flow cartograms, scatter diagrams to represent geographical data
3. Taking case study and preparing report

Course Learning Outcomes:

On successful completion of this course the student should know:

1. Methods of geographical data representation
2. Preparing Case Study report

Course Content:**Unit-1-** Linear and exponential growth rate of population; Standardization of data using "Z" Score**Unit-2-** Areal or Stigler's method, Volumetric or Sten de Geer's Method, Pie Diagram (Representing urban population, Value-area Cartograms,**Unit-3-** Traffic-flow Cartograms, Scatter Diagrams, Spherical Diagrams, Compound pyramid (Growth of rural-urban population), Superimposed pyramid diagram**Unit-4-** A case study on evaluation of any selected programme in a village or ward using Secondary and or Primary data to be done by a group of five to ten students. The report should be handwritten on A4 size page in candidate's own words not exceeding 1000 words (excluding references). The report should contain a proper title and incorporate relevant maps, tables, diagrams, and references not exceeding 8 pages, photographs are optional.**References-**

V. PROJECT
DISSERTATION/ PROJECT/ TEACHING APTITUDE

[PRGEO405]

Marks: 30 (MSE: 20 Viva + 5 Attd. + 5 Record) + 70 (ESE Pr: 6 Hrs) = 100

Pass Marks: = 45

(Credits: 04, 120 Hours)

Guidelines to Examiners for

End Semester Examination (ESE):

The evaluation of the dissertation will be done in 100 marks (70 marks + 30 marks of the session). The sessional component will be evaluated by the concerned supervisor.

The end term evaluation (70 marks) will be done by a board of examiners. The end term evaluation in 70 marks will include the literary and scientific presentation of the dissertation and the performance in the viva-voce.

Overall project dissertation may be evaluated under the following heads:

- Motivation for the choice of topic
- Project dissertation design
- Methodology and Content depth
- Results and Discussion
- Future Scope & References
- Participation in Internship programme with reputed organization
- Application of Research technique in Data collection
- Report Presentation
- Presentation style
- Viva-voce

Course Objectives:

1. To develop research skills and scientific inquiry through independent investigations of a Geographical problem.

Course Outcomes:

On successful completion of this course the student should know:

1. About conducting a research with approve stages of research methodology in Geography. Dissertation will enable student to further investigate and navigate different aspects and events of life through research.

PROJECT WORK

Each student has to submit three copies of hard bound dissertation work (along with the raw data), duly forwarded by the HOD of Department concerned. The forwarded copies will be submitted in the Department of Geography, Ranchi University, for evaluation (one month before the viva voce examination).

The paper may involve:

- (a) Laboratory research/ Field work/ Lab work related to the project.
- (b) Survey research, Case Study or any other type of Research in Geography
- (c) One Large study/ Experiment or several studies/ Experiments depending on the objectives of the research.
- (d) The writing of dissertation must be within 80 to 100 pages including references and appendices.
- (e) Content must be typed in Font: Times New Roman with Line Spacing: 1.5 and Font Size 14 points.

Presentation of project work in the seminar on the assigned topic in the P.G. Department of Geography, Ranchi University, Ranchi & open viva there on.

Topics: As decided by the Supervisor/Guide

TEACHING APTITUDE: Only selected candidates, in alternative to the Dissertation, may be provided duty to teach the assigned topics in selected colleges. The performance may be evaluated based on the organized feedback for the candidate.
